16 FEBRUARY 2023
9.30 - 15.00

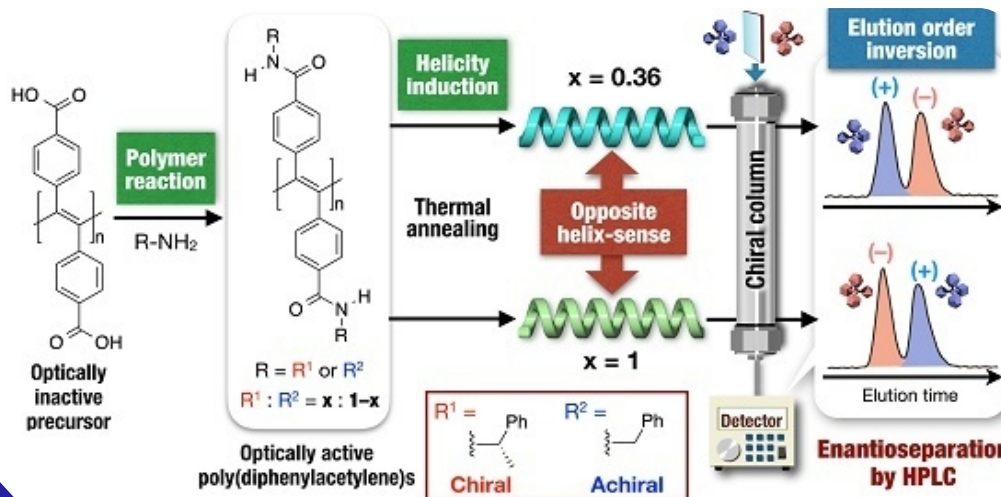

Speaker

Mr. Supat Muangyot
(Sales Director)

Patpanat Sermmai, Ph.D
(Product Manager)

THE NOVEL INNOVATION TOWARDS THE STEREOSPECIFIC DRUGS

Since the pharmacological action of enantiomers in human body varies widely or even opposites, therefore the purity of chiral compounds plays an important role in human health and safety. Currently, to avoid any trouble side effects from another enantiomeric form, the investigation of various techniques to acquire the absolute configuration (AC) and enantiomeric purity of chiral compounds especially in pharmaceutical industry is extremely important. This seminar is aimed to overview the current market of chiral drugs along with the exploring of the proper methods to generate enantiomerically pure compounds such as the generation from the novel flow stereoselective/stereospecific synthesis or the chiral separation from the racemic mixture, etc.
